

Luxembourg, June 14th

Press release Luxembourg Internet Days 2021: be prepared!

The Luxembourg Internet Days 2021 will be held from 16 to 18 November in a digital way!

Due to the pandemic, LU-CIX, the organizer of the Luxembourg Internet Days event, has decided to organise a digital event for the second year running. Following a successful digital event in 2020, using the same online event platform, the 2021 edition will continue to offer all the features of a high-quality live event... as though everybody were there in person!

Network Security & Cloud Security will once again take centre stage, as they are essential components in preventing crises and keeping business running. Pragmatic sharing throughout the three days will help CIOs, CTOs, CISOs, DPOs and decision makers from all sectors to stay on top of evolving threats and help them to identify the most appropriate solutions to tackle the challenges they are facing.

When it comes to the Internet and the Cloud, 2021 is no exception: cybersecurity is still the number one topic. There is so much to discuss, debate, explain and challenge through panel discussions, keynote speeches, workshops and networking. So, the organizer has selected the hottest topics mostly gathered under the umbrella of the European Cybersecurity strategy. This includes the ambition of the Gaia-X project, zero trust vs traditional operating models, post quantum cryptography as the most promising defence against quantum attacks, an update on the NIS Directive, and the ins and outs of the emerging Cyberinsurance possibility.

The full day of 18 November will be dedicated to the specific challenges the Finance & Insurance sectors face securing their Internet access and deploying compliant Cloud based services in accordance with the European regulations, directives and local circulars.

No less than three ministers, who are involved in these important topics at the highest level, and many key international experts have already confirmed their presence to contribute with their insights and vision for the present and the near future. Cross sector panel discussions will boost exchanges and spark discussions. Presentations, interviews and workshops will allow mutual enrichment while the virtual expo area throughout the event and the networking tool will support sharing from the one single digital platform (Swapcard).

Save the date, register for free online and stay tuned!

About LU-CIX

LU-CIX, the LUXembourg Internet eXchange was founded in 2009 based on a not-for-profit membership association with an open and neutral philosophy. Its aim is to develop the Internet and support the data center community in Luxembourg. As well as providing the technical infrastructure LU-CIX also makes a major contribution to the Luxembourg Internet community through its leading industry event, Luxembourg Internet Days which takes place in November every year and attracts over a thousand industry experts and decision makers from around the globe. LU-CIX also runs the datacenters-in-europe.com website, which provides a shared communication platform for all the players in the Luxembourg data center and Internet arena and promotes Luxembourg as the best place for your European data center and ICT business in the heart of Europe.
