

Luxembourg, October 5, 2021

Press release

Luxembourg Internet Days 2021: A full digital event to keep threats at bay!

The Luxembourg Internet Days event - the ICT event from the sector for the sector - will be back for an online edition from 16 to 18 November, with the aim to keep threats at bay.

Network Security & Cloud Security

Network Security & Cloud Security are on this year's 3-day programme. A full day is dedicated to the projects implemented for a greater cyber sovereignty of Europe with a special focus on the Holy Grail - the subject of a European Cloud. A whole day will be devoted to new trends in cyber security and the fight against penetration of systems with the Zero Trust model, end-to-end security, or post-quantum cryptography. DNS Securing will also be discussed in depth. On 18 November, the event will offer a focused programme especially designed for IT & ICT decision makers from the Banking & Insurance sectors to strengthen their knowledge and capacity to deploy compliant Cloud-based services.

Several expert panels will enable very cross-functional and cross-industry interactive discussions on the challenges of teleworking in a post-pandemic environment, the use of law enforcement in cybersecurity and European Cloud design efforts.

Numerous trendsetting companies are partnering with the event

BCE, cegecom, Cybersecurity Luxembourg, EBRC, Huawei, Luxnetwork, Telindus, YesWeHack, and many others will participate with either a presentation or a virtual booth to keep offering their expertise to decision makers from the Greater Region and beyond.

Taking advantage of the digital format

With its professional digital platform, the Luxembourg Internet Days event will allow registered people to start networking in total security long before the start of the event. From mid-October, those registered will be able to chat or video call with an unlimited number of registrants, free of charge. During the three days of the event, attendees will be able to listen and interact with experts during keynotes, business case presentations and panel discussions and to directly participate in open workshops. Another advantage of this digital edition is the possibility for all registered professionals to watch or re-watch all the sessions on replay for several weeks after the event has ended.

RPKI and DNS in general at the LUNOG4 Conference

Once again, the LUNOG4 Conference* will be part of the Luxembourg Internet Days 2021 event on 17 November from noon to 14:00. RPKI and DNS in general, respectively DNSSEC and Anycast, are the topics identified as the focus for this year. Experts will share on how and why the different tools and means can help defend against hijacks that may be caused by either wrong announcements on one side or lack of know-how on the other.

Anyone interested in being brought up to speed can join the LUNOG4 Conference once registered for the Luxembourg Internet Days 2021 event.

*LUNOG stands for LUXembourg Network Operators Group, which includes any professional interested in Network operation.

Access to the digital platform of the Luxembourg Internet Days event is subject to free online registration. Register now at <https://www.luxembourg-internet-days.com/>
