Press release

The convergence of IT and OT
at the Luxembourg Internet Days 2022

For its ninth edition in a row, the Luxembourg Internet Days are back in person at the premises of the Luxembourg Chamber of Commerce on November 15 & 16.

Organized with the partnership of many local institutions and the European Commission, the 2022 edition will put the United States in the spotlight. « **Keeping the internet safe and secure is of paramount importance to us and we are happy to share our experience with our Luxembourg partners and friends. We look forward to a great event!" said H.E. U.S. Ambassador Thomas Barrett.**

The event will bring together more than a thousand IT and ICT professionals to exchange in a pragmatic and rather technical way on the challenges they must face to continue to protect their organizations.
The convergence of IT and OT having become an unavoidable reality, it is impossible today to talk about developments in Industry (now 4.0) without mentioning this convergence which brings industry IT managers, as well as those from other sectors of activity, to face new security challenges related to the connection of their production, control, or flow management tools to the Internet.
The Internet is now in all layers of any company. Therefore, the Luxembourg Internet Days 2022 will, on top, give pride of place to the management of Operational Technology (OT) issues which impact the daily life of IT professionals, whether in telecom networks, industry, logistics, the health sector, critical infrastructures, transport of people and goods, etc.

Schneider Electric, SIGA OT, and others will share their vision of the evolution of these security issues applied to critical or non-critical infrastructures, to means of communication and production.

Resilience, back-up, and business continuity
Because protecting the business upstream is never a 100% guaranteed process, we will also talk resilience, back-up, and business recovery after an attack with testimonials and solution proposals.

This edition promises once again to be rich in lessons. Be a part of it and don't miss anything, by registering today for free online at https://www.luxembourg-internet-days.com/
Check the programme and look for other visitors and experts present at the event. Seek know-how to improve your expertise. The access is free of charge for visitors.

Find key players such as Cohesity, Corelight, EMIOS, Kappa Data, LuxConnect LuxNetwork, POST, Telindus, Radware, and many others.

Event organized with the support of Cybersecurity Luxembourg, the Luxembourg Chamber of Commerce, the European Commission, the Ministry of State SMC and the Ministry of Economy.

About LU-CIX
LU-CIX ASBL, the LUxembourg Internet eXchange, was founded in 2009 based on a not-for-profit membership association with an open and neutral philosophy. Its aim is to develop and support the Internet and data center ecosystem in Luxembourg by providing the national peering infrastructure and by promoting the national and European ICT community.

LU-CIX brings a major contribution to the Luxembourg Internet community by organising its leading industry event, the Luxembourg Internet Days, which takes place every year and attracts over a thousand industry experts and decision makers from all around the globe.

LU-CIX also runs the datacenters-in-europe.com platform, which gathers the Luxembourg data center and Internet related players to promote Luxembourg as the best place for a data center and ICT business in the heart of Europe.

LU-CIX GIE was also launched in 2009 to operate the Internet eXchange infrastructure. In 2021, the Luxembourgish State, together with LU-CIX GIE, launched MyConnectivity G.I.E. to support the access to high performance connectivity for all (private households and businesses) in the context of the 5G and ultra-high-speed national strategies.
