NETWORK SECURITY & RESILIENCE Critical Infrastructures and Industry November 7 & 8, 2023

a LU-CIX event hosted @ the Luxembourg Chamber of Commerce

Now in its 10th edition, the Luxembourg Internet Days event has become the unmissable occasion for ICT, IT & OT professionals to gather, learn and share in both a technical and pragmatic way with sector experts and trendsetters on the Internet related challenges they face due to the increasing pressure of IT & OT convergence.

Designed around keynote speeches and interactive sessions and debates, alongside a vibrant exhibition area and focused workshops, the event attracts more and more professionals from the Greater Region and beyond, and notably from the event partner country of the year; **Portugal** in 2023.

Focused on **Network Security & Resilience**, the event aims to gather professional Internet users from all sectors and will use the **Critical Infrastructures and Industry** requirements to inspire other sectors.

Professionals and experts from Portugal will be especially invited to share this momentum in Luxembourg to strengthen business relationships around Cybersecurity and Resilience topics.

The **LUNOG6 Conference** will once again gather the local professional ecosystem interested in Network Operations around expert speakers for interactive sessions to raise the bar.

Final-year students are more than welcome for an immersion into their future professional world. They will have the opportunity to experience workshops, listen to inspiring business cases, and meet with potential employers.

Join us in Luxembourg, the trusted ICT hub at the heart of Europe and enjoy an enriching gathering!

Frédérique Ulrich
Event organiser

Claude Demuth
Chairman of LU-CIX ASBL

LU-CIX is proud to present the 10th edition of the Luxembourg Internet Days, the only real cross-industry event, organised from the ICT sector in Luxembourg for the European ICT & OT professionals, to discuss Internet related challenges and to help increase awareness and grow skills.

The event is one venue, two days and the best opportunity to feel the pulse of the ICT, IT and OT sectors in Luxembourg, the Greater Region, and beyond.

With its unique and successful design, the Luxembourg Internet Days has become a "must" event for Internet related professionals and experts with more than 1,100 professional visitors over the two days.

THEMES: NETWORK SECURITY & RESILIENCE - CRITICAL INFRASTRUCTURES AND INDUSTRY

- Experts' presentations,
- Panel discussions,
- Business case presentations,
- An Expo with up to 50 booths (1),
- 45-min interactive workshops,
- A professional "speed-dating" tool (2),
- A networking evening, the "Sunset Eve" (3), with a special party at the occasion of the 10th event's edition.

Several side-events:

LUNOG6 Conference

Following the success of the five previous editions, the LUNOG6 Conference will be held in partnership with RIPE NCC to gather the local Network Operators and help them raise the bar with high-level technical sharing.

Digital Skills & Jobs workshop for final-year students

The Digital Skills and Jobs Coalition and the Department of Media, Connectivity and Digital Policy from the Ministry of State invites BTS students and experts from the IT and digital world to interact, reflect and exchange on themes around critical infrastructures, especially in industry, with a focus on new skills and jobs.

The State of Connectivity - by MyConnectivity

We will be taking stock of the current situation of connectivity in Luxembourg. Expert panelists from different sectors will be reflecting on the main challenges of ultra-high-speed digital connectivity and discuss how to move forward.

Programme available online as from October at www.luxembourg-internet-days.com.

PARTNER COUNTRY: PORTUGAL

Portugal has been very engaged in cybersecurity for the last decades. With its inclusive cybersecurity strategy resulting in a huge national action plan, the different entities responsible for cybersecurity cooperate to make Portugal a safer, modern, and competitive country. The Portuguese information technology (IT) sector is dynamic, resilient, mature, and well-integrated into global value chains, factors that stimulate the demand and trust of its international and domestic customers. Through innovative, inclusive, and resilient actions, Portugal has raised itself as a partner of choice with highly skilled talent and R&D, great logistic infrastructures, advanced and reliable communication systems, strong investments in technologies, and a friendly and safe economic environment.

Therefore, the Luxembourg Internet Days 2023, on its 10th edition, will put Portugal in the spotlight. It will be a timely occasion to share experiences and visions of cybersecurity and to start or reinforce existing links with a strong will to work together.

Exclusive & free of charge for Portugal-based entities joining:

Entities based in Portugal with either expertise, solutions, or an interest in Network Security and Resilience; or that are looking for partnerships with Luxembourg-based players in this domain are more than welcome to join the event and can benefit, free of charge, from a two-day stand and two entries to the Sunset Eve networking evening (On November 7).
